

Honeywell Portable Air Conditioners

**A compact, easy to use
portable cooling solution.**

Honeywell

Introduction

Honeywell Portable Air Conditioners are available in a comprehensive range of cooling options for consumer comfort. With designs to suit all types of decors, Honeywell Portable Air Conditioners incorporate innovative pioneering features that make them easy to operate.

Honeywell Portable Air Conditioners are ideal for spot cooling. The compressor, condenser and evaporator are housed in a compact unit. The air is filtered, dehumidified and cooled by the unit. A flexible air outlet hose sends the heat to the outside. All models include a window

venting kit which is easy to set up. Honeywell Portable Air Conditioners are equipped with a patented auto evaporation system. This sends the condensate moisture to the outside through the air outlet hose, eliminating the need of a drainage tank.

Honeywell Portable Air Conditioners offer a flexible air-conditioning solution. They do not require professional installation and can be easily set up and put into operation anywhere. You just need a place to plug them in and an outlet for the flexible air outlet hose.

Cooling Capacity – Honeywell Portable Air Conditioners are available in capacities ranging from 5000 btu to 14000 btu.

Hydrophilic Fins – The fins of the heat exchanger are coated with a special material to make them hydrophilic. This prevents the water droplets from accumulating on the fins and improves the efficiency of the heat exchanger.

Auto-Drain – Honeywell Portable Air Conditioners do not need a drainage tank. They automatically evaporate the condensate through the air outlet hose. No need to worry that your carpet gets wet due to an overflowing tank.

R410A Refrigerant – All our models use Honeywell R410A refrigerant which is more energy efficient than conventional R-22 refrigerant.

Function – Honeywell Portable Air Conditioners can operate under the following modes:

Cool – For cooling and dehumidification.

Dehumidify – To reduce the humidity level.

Fan – To circulate the air.

*Heat** – To warm the room.

LCD Display* – Comprehensive information on the LCD display makes the product user friendly. The LCD displays temperature set, timer setting, fan speed and mode. It also has a warning light for any malfunction.

Remote Control – Enables conveniently changing the temperature setting, operation mode and timer from a distance.

Dehumidification – All models can be set to dehumidify the air, making minimal change in temperature.

Fan Speed – In all modes the fan can be set to low, medium or high to suit your needs.

Timer – For your convenience the units can be programmed to switch off from 1 to 24 hrs.

* Available in selected models

MM Series

The MM Series of Honeywell Portable Air Conditioners have a sleek and contemporary design with advanced features that meet today's demanding consumer needs. They are equipped with multiple functions including a fan, cooling, dehumidification and heating (Model MMCHCS only), making them flexible for use in almost any room or office.

They feature a high efficiency compressor, electrostatic filter, built-in heat pump (MMCHCS only) & built-in de-humidifier. This new series of Honeywell Portable Air Conditioners perform smoothly and quietly, so you can enjoy a better nights rest. The smooth-gliding castors allow you to roll the units from room to room, as you need.

Easy Installation

Auto-Evaporation System

Feather-Touch Controls

Built-in Heat Pump (optional)

MM14CCS / MM14CHCS

Features / Specifications :

Cooling,
Dehumidification,
Fan

R410A high efficiency
compressor

Auto Evaporation
System – No need to
empty a water tray

14,000 BTU Cooling Capacity

Power Air-flow
with 3 Fan Speeds

Automatic On/Off Timer
Programmable up to 24 hours

Adjustable Temperature
of 18~40°C / 64-104°F

Digital LCD Display,
provides precise
temperature control

Noise level
of 54 dbA

De-humidification
Capacity
(L/H) of 1.8L
(L/24H) of 43.20 L

Available in
Dual Hose or
Single Hose
1.2 mtr

Remote Control

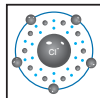

All installation
accessories
included

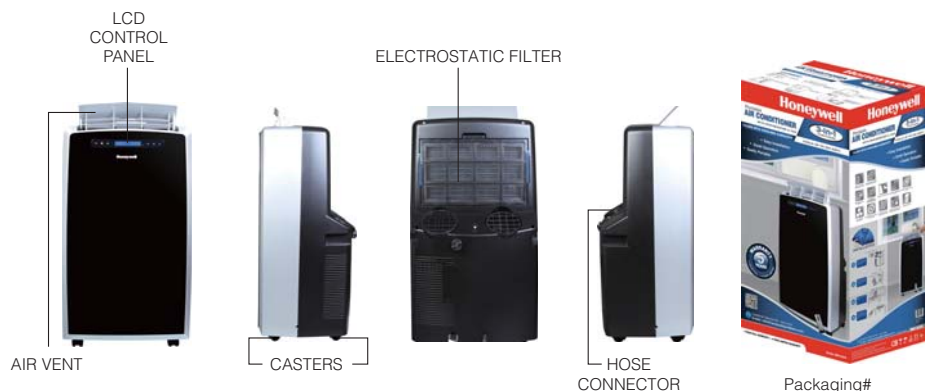

Optional Features :

With Heater
11,000 BTU Heating Capacity
(Model MM14CHCS)

ionizer for improved
air quality
